COURSE INTRODUCTION

The use of quality management has become widespread among organizations during the last decades.

The type of organizations that use TQM varies from large to small, private to public and from manufacturing to service organizations.

The aims of the businesses may differ, but the impotence of customers is a matter of common interest and the ability of organizations to adapt to new customer requirements on a global market is of vital importance for long-term success.

Quality management has been recognized as a major edge for competitiveness and long-term profitability.

TQM is not merely a tool or method that is ready for use, but there is a set of underlying principles and philosophies that must be applied in the unique organizational context.

COURSE OBJECTIVE

Upon completion of this course, participant will be able to:

- Discover the importance of quality in organizations.
