

**ADVANCED TRAINING  
ON STORAGE, HANDLING  
AND SAFE USE OF  
CHEMICAL HANDLING  
AND HAZARDOUS  
MATERIALS**

**HSE133**

**Health, Safety &  
Environmental**

**COURSE TITLE**

**ADVANCED TRAINING ON STORAGE, HANDLING AND SAFE USE OF  
CHEMICAL HANDLING AND HAZARDOUS MATERIALS**

**COURSE DATE/ VENUE**

07 – 11 December 2019

London, UK

**COURSE REFERENCE**

HSE133

**COURSE DURATION**

05 Days

**DISCIPLINE**

Health, Safety & Environmental

**COURSE INTRODUCTION**

The storage and safe handling of chemicals and hazardous materials require compliance with a complex array of regulations and the use of specialized technical facilities, operations and equipment to ensure safe and proper management. This course provides a practical method of assessing the properties of chemicals and tracks the legislative framework that surrounds the safe management of these materials.

This course also provides practical guidelines for identification, segregation and movement of chemicals, as well as methods for the evaluation of facilities and specialized equipment necessary for the safe and effective storage and transfer of hazardous chemicals.

## **COURSE OBJECTIVE**

### **Upon successful completion of this course, the delegates will be able to:**

- ✓ Reduce the potential hazards and remove risks or minimizing the potential consequences in the event of an incident.
- ✓ Develop a practical guideline for the evaluation and general design of operations used for the safe and effective storage and handling of chemicals.
- ✓ Recognize a range of industrial scenarios. The practical case studies and exercises will provide the participants with the necessary knowledge and guides for right and safe handling of chemicals in petroleum sites.

## **COURSE AUDIENCE**

All site staff handling chemicals.

Material managers and facility operators who store or handle chemicals, Engineers with limited knowledge of chemicals and their properties, construction site managers, engineers and architects responsible for the design of facilities for hazardous materials management, personnel responsible for implementing training programmes and methods for hazardous chemicals, managers wishing to ensure compliance with applicable legislation and a reduction of risk for hazardous chemicals management, and safety personnel plus other people whose position in the company requires them to acquire this knowledge.

## **COURSE CONTENT**

### **DAY 1**

Introduction

- Relevance of ISO 14001 EMS, and OHSAS 18001

Identification, Classification and Properties of Hazardous Chemicals

- Hazardous Chemicals Definitions
  - Health Hazard
  - Physical Hazard
- Hazard Rating

- Hazard Classes
- Classification of Chemicals:
  - Methods of Classification
  - Solids, liquids, gases
  - Flammable & Explosive Chemicals
  - Inorganic and organic materials
  - Oxidants and reducing agents
- Physical Properties of Chemicals
- Hazard Classification Systems

#### Fire Hazards

- Toxicity Hazard
- Corrosive Hazard
- Chemical Reactivity Hazard

### DAY 2

#### Exposure Hazards & Health Effects Chemicals

- Overview
- Routes of Entry
- Acute Effects
- Chronic Effects
- Exposure Definitions, Limits & Calculations
- Health Effects of Chemicals
- Eyewash
- Emergency Shower
- Medical Consultation

#### Chemical & Hazard Labelling

- Overview
- Chemical Labelling
- Hazard Identification System

- Warning Systems

#### Material Safety Data Sheet (MSDS)

- Overview
- MSDS Content
- How to Read MSDSs and Understand Them.
- Exercise-1: A group discussion of some MSDSs of Typical Chemicals used
- Exercise-2: Selected participants will be required to read and explain for the others some MSDSs

### **DAY 3**

#### Storage of Chemicals

- Overview
- Chemicals Compatibility
- Bulk Chemical Storage Facilities
- Storage of Flammable & Explosive Chemicals
- Storage of Compressed Gas & Cryogenics
- Specialized Storage Requirements
- Common Mistakes in Chemical Storage
- Case Study

#### General Rules & Precautions of Chemical Handling

- Overview
- Work Practice Controls
- Basic Chemical Handling
- Handling of Compressed Gas
- Working Alone
- Standard Operating Procedures (SOP)
- Fire Precautions
- Warning Notices & Security
- Good Housekeeping

- Case Study: to show some common wrong actions & ask the participants to propose the correct safe procedures \_ Group discussion.

#### Personal Protection

- Personal Protective Equipment (PPE) and Clothing
- Introduction
- Selection Criteria
- Equipment / PPE Use
- Transportation of Chemicals
- Overview
- Legislative requirements
- Labels, Marking and Placards for packages, trucks and large containers
- Containers
  - Types
  - Basic Design and Main Properties
  - Inspection of Containers
- Loading and Unloading
- Compressed Gas Cylinder Transportation
- Emergency Response

#### Case Histories of Hazardous Chemicals Mismanagement

#### **DAY 4**

#### Chemical Waste Disposal

- Hazardous Chemical Waste Disposal Policy
- Chemical Safety
- Chemical Waste
- Basic procedures
- Containers
- Container condition
- Container volumes & sizes

- Labelling of containers
- Disposal of empty containers
- Storage of waste chemicals
- Bulking or mixing of waste chemicals
- Over packing or boxing up of multiple chemical containers
- Chemical removal request form
- Hazard identification
- Hazardous materials program
- Case Study

#### Identification and Dealing with Unknown Chemicals

- Classification of Chemicals
- Unknown Chemical Identification Techniques
- Basic Precautions and Methods of Dealing with Unknown Chemicals

### **DAY 5**

#### Chemicals Spill Response

- Chemical Spills
- Minor Chemical Spills
- Emergency Chemical Spills
- Spill of Solid, Liquid and Volatile Chemicals and Clean-up Procedures
- Leaking Compressed Gas Cylinders & Vessels
- Spill response equipment (contents, materials, compatibility, size, capacity, back-up, placement locations)
- Spill Contingency Plan
- Fires
- Fire Plan (requirements, reactions, explosions, firefighting methods)
- Loss prevention procedures
- Release of Toxic Gases
- Levels of Protection (Level A, B, C, D)
- Medical Emergencies

- General first aid and Personal protection during 1st aid
- Case Study & Group Exercise: Certain Chemical Spills (including Oil Spill), The Response & The Clean-up Procedures

#### Site Emergencies/Contingency Plan

- Introduction
- Preparation
- Field Actions
  - Site and Work Preparation
  - Emergency Response Procedures
  - Evacuation
  - Leadership During an Emergency

#### **COURSE CERTIFICATE**

**TRAINIT ACADEMY** will award an internationally recognized certificate(s) for each delegate on completion of training.

#### **COURSE FEES**

\$6,150 per Delegate. This rate includes participant's manual, Hand-Outs, buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

#### **COURSE METHODOLOGY**

The training course will be highly participatory and the course leader will present, guide and facilitate learning, using a range of methods including formal presentation, discussions, sector-specific case studies and exercises. Above all, the course leader will make extensive use of real-life case examples in which he has been personally involved. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Case studies & Practical Exercises
- 10% Role Play
- 10% Videos, Software or Simulators (as applicable) & General Discussions
