

# **NATURAL GAS PROCESSING, SWEETENING & SULPHUR RECOVERY**

**PCE176  
Process and  
Chemical  
Engineering**

**COURSE TITLE**

**NATURAL GAS PROCESSING, SWEETENING & SULPHUR RECOVERY**

**COURSE DATE/ VENUE**

28 October – 01 November 2019

Prague, Czech Republic

**COURSE REFERENCE**

PCE176

**COURSE DURATION**

05 Days

**DISCIPLINE**

Process and Chemical Engineering

**COURSE INTRODUCTION**

The Gas and Liquid Contracts that exist (or are being negotiated) will determine the objectives of the processes that you will have to incorporate into any new facility and how you have to operate any existing facility. There exists a variety of processes that will condition your Natural Gas and Hydrocarbon Liquids to satisfy the Contract requirements. The objective of this course is to make you aware of the options available to you so that you can evaluate all the processes that will satisfy your objective to determine which particular process is the best from a capital cost and operating cost perspective.

**COURSE OBJECTIVE**

**Upon successful completion of this course, the delegates will be able to:**

- ✓ Evaluation and selection of processes to remove acid gases (H<sub>2</sub>S, CO<sub>2</sub>, COS, CS<sub>2</sub>, mercaptans, etc.) from gas and NGLs

- ✓ The advantages and disadvantages of available gas treating technology and processes
- ✓ How to estimate solvent circulation rates, energy requirements, and equipment sizes
- ✓ recognize and evaluate solutions to common operating and technical problems
- ✓ Sulphur recovery technologies, including an overview of the Claus Sulphur process
- ✓ How to select among the proper sulphur recovery process given differing process conditions
- ✓ Describe Tail gas clean up

### **COURSE AUDIENCE**

This course is designed for project managers, plant managers, plant supervisors, technical staff, and contractor personnel involved in project planning, process selection and operation of Natural Gas Production. The greatest benefit arises from considering all the processes that will accomplish your process requirements to determine which one is the best for your particular application from a capital cost and operating cost perspective. You will also be able to see which processes are available to you to de-bottleneck or modify existing processes. The practical techniques and examples provide useful insights that are valuable at any stage of project execution and operation.

### **COURSE CONTENT**

Gas & Liquid Process Selection

Contract Terms

Basic Consideration

Gas Contracts

- Quantity
- Quality
  - Heating Value
  - Sulphur Content
  - Maximum Temperature

- Water Content (H<sub>2</sub>O Dewpoint)
- Hydrocarbon Dewpoint (HCDP)
- Other (N<sub>2</sub>, He, Ar, CO<sub>2</sub>, Hg, O<sub>2</sub>)

#### Liquid Contracts

- Commercial Ethane
- Commercial Propane
- Commercial Butane
- Butane-Propane Mixes (LPG)
- Propane HD-5
- Natural Gasoline

#### Overall Production System

#### Solution Gas

#### Associated Gas

#### Non-Associated Gas

#### Gas Processing Module

#### Gas Conditioning Module

- H<sub>2</sub>O Removal (Dehydration)
- H<sub>2</sub>S & CO<sub>2</sub> Removal (Gas Sweetening)
- Nitrogen Removal
- Mercury Removal
- Oxygen Removal

#### NGL Extraction Module

- Products
- Absorption (Lean Oil)
- Adsorption (HRU)
- Condensation
  - Mechanical Refrigeration
  - Mixed Refrigerants
  - Turbo Expander
  - Twister

- JT Refrigeration

Stabilization Module

Product Treating Module

Characterization of Natural Gas & it's Products

Physical Properties of Pure Components

Ideal Gas Laws

- Boyle's Law
- Charles' Law
- Avogadro's Principle
- Dalton's Law
- Combined Ideal Gas Law

Physical Properties of Mixtures

Equations of State

- Van der Waals
- Redlich-Kwong (RK)
- Soave Redlich-Kwong (SRK)
- Peng Robinson (PR)
- Benedict-Webb-Rubin-Starling (BWRS)

Thermodynamic Properties

- Entropy
- Enthalpy

Equilibrium Ratio (K Value)

Separation

Types of Separators

- Horizontal
- Vertical
- Spherical
- Centrifugal
- Cyclone
  - Reverse Flow
  - Axial Flow

- Recycling
- Filter
- Liquid Coalescer

Water Vapour Removal (H<sub>2</sub>O Dewpoint Control)

Water Content

- HC Liquids
- Natural Gas
- Effect of H<sub>2</sub>S & CO<sub>2</sub>

Hydrate Formation Temperature

- Effect of Propane
- Effect of H<sub>2</sub>S & CO<sub>2</sub>

CaCl<sub>2</sub> Dehydrators

MeOH Injection

EG Injection

IFPEX-1

TEG Dehydration

Solid Desiccant Dehydration

HCDP Control

Adsorption (HRU's)

- 2 TOC
- 2 TCC
- 3 TOC
- 3 TCC
- 3 TOC w/TGC
- 3 TCC w/TGC
- Purge Cycle

JT Refrigeration

- LTX
- LTS

Mechanical Refrigeration

- Variations

Twister

Refrigeration Compressors

- Compression Cycle
- Single Stage
- Single Stage w/Economizer
- Two Stage
- Types
- Drivers

Gas Sweetening

Terminology

Safety Precautions

Types of Contaminants

Process Selection

Chemical Reaction Processes

- Amines
  - Chemistry
  - Typical PFD
  - General Considerations
  - Amines Used (MEA, DEA, DGA, MDEA, TEA, DIPA, Formulated Solvents)
  - Control Variable
- Caustic Wash
  - Chemistry

NGL Extraction

Low Temperature Mechanical Refrigeration

JT Refrigeration

Refrigerated JT Expansion

Adsorption (Lean Oil)

Turbo Expander

- Typical PFD
- Solid CO<sub>2</sub> Formation
- Solid Desiccant Dehydrator

- Inlet Compression
- Gas/Gas Exchangers
- Expander
- Re-Compressor
- De-Methanizer

Gas to Liquids

Sulphur Recovery

Claus Plan

Modified Claus Plants

- Typical PFD – 3 Stage
- Process Considerations
- Mechanical Considerations
- Instrumentation

Tail Gas Clean-up

- Incineration
- Super Claus 99
- Super Claus 99.5
- SCOT

Liquid Redox

### **COURSE CERTIFICATE**

**TRAINIT ACADEMY** will award an internationally recognized certificate(s) for each delegate on completion of training.

### **COURSE FEES**

\$6,150 per Delegate. This rate includes participant's manual, Hand-Outs, buffet lunch, coffee/tea on arrival, morning & afternoon of each day.

### **COURSE METHODOLOGY**

The training course will be highly participatory and the course leader will present, guide and facilitate learning, using a range of methods including formal presentation,

discussions, sector-specific case studies and exercises. Above all, the course leader will make extensive use of real-life case examples in which he has been personally involved. You will also be encouraged to raise your own questions and to share in the development of the right answers using your own analysis and experiences. Tests of multiple-choice type will be made available on daily basis to examine the effectiveness of delivering the course.

- 30% Lectures
- 30% Workshops and work presentation
- 20% Case studies & Practical Exercises
- 10% Role Play
- 10% Videos, Software or Simulators (as applicable) & General Discussions
